

### REMARKS

Applicants respectfully request entry of the above amendments prior to prosecution of the application. Structures (I) and (II) have been amended in CHART A and Claims 1 and 12 to correct an inadvertent error in drawing the structures. Specifically, the oxygen groups in one of the ketal rings of the structures have been moved to their correct positions. The amendments do not introduce new matter. A person of ordinary skill in the art would recognize the error in the position of the oxygen groups by looking at the structures, particularly in view of the names and descriptions of the structures at numerous locations throughout the specification.
